

IMMEA DOSATRICE FILLING AND PACKING

Whatever your filling or packing needs, **IMMEA** will have the solution.

During over 25 years of activity, **IMMEA** have been involved in a wide range of products, providing technical solutions for a large variety of customer problems.

- ***From the smallest tin to the largest tank***
- ***In all sizes and shapes of containers***
- ***Using every type of closure***
- ***From the simple filling unit to the most complete filling and packing line (pallet to pallet).***

Each machine is tailor made to suit the individual needs of the customer and can be classified into 2 main categories:

1. Automatic or Semi Automatic
2. Gravimetric or Volumetric

Suitable for products such as light solvents, curing agents, dense paste and many other products used in the chemical and food industries.

Please consider the attached descriptions as examples of what can be offered as experience tells us that a standard machine cannot meet the specific requirements of our many and varied potential customers.

All equipment conforms to the European Standard (89/392 CE and DPR 24 – 07 -1996 N° 459)

UVC SEMI-AUTOMATIC VOLUMETRIC FILLING MACHINE

Providing the same cost effective solution as the DPC Filler, the UVC provides a **VOLUMETRIC** solution allowing a wide range of volumes to be accommodated.

3 Different sizes are available in the UVC range:

1. 50cc to 2700cc (5400cc using automatic double stroke)
2. 200cc to 5600cc (11200cc using automatic double stroke)
3. 500cc to 8500cc (17000cc using automatic double stroke)

DAP SERIES

FULLY AUTOMATIC GRAVIMETRIC FILLING MACHINE

- Single or multi head system as necessary
- Pneumatic operated and controlled or by PLC
- Complete with :
 - Empty container feeding
 - Product feed by gravity or pump or hopper
 - Cover, cap, dispensing
 - Marking or labelling
 - Container closure – press, crimping, rolling, screwing etc
- 100grs to 60kgs

DPC – 1500

SEMI-AUTOMATIC GRAVIMETRIC FILLING MACHINE

- Perfect for drums (50 to 200l) or tanks up to 1000l on a pallet.
- Mechanical or load cell scale system
- Filling from above or below the container hole edge.
- Foaming products are filled from below the liquid level to reduce foam
- Capacity from 5kgs to 1500kgs

D.PORT 1500

FULLY AUTOMATIC GRAVIMETRIC FILLING MACHINE

- Ideal for drums handled on a pallet, pre-orientated filling holes or automatic filling hole location
- filling from above or below the filling hole edge
- Filling from below the liquid level to reduce foam
- Capacity up to 1500 kgs

DAV FULLY-AUTOMATIC VOLUMETRIC FILLING MACHINE

- Single or multi heads as necessary
- Pneumatic operation and control or via PLC
- Complete with:
 - Empty container feeding
 - Container orientation or checking (leak detection)
 - Product feeding system by gravity, pump or hopper
 - Cover, cap, dispensing
 - Marking or labelling
 - Container closing: press, crimping, rolling, screwing, etc.
 - Availability (single stroke, single head) 50cc to 2700cc

200cc to 5600cc

500cc to 8500cc

1000cc to 21000cc

H.C (HIGH CAPACITY) FILLING MACHINES

Although IMMEA have met a great many technical challenges of different products during the past 25 years, the main concentration of our designs was to meet the requirements in the field of paint manufacture. However, in recent years emerging markets with different products have shown a demand for a new type of filling machine with higher capacity outputs.

To meet the new challenges, a new series of filling machines has been produced identified as *H.C (High Capacity)*. This series is capable of doubling the traditional output of our standard machines and answers the problems faced by manufacturers of *Solvents, Lubricants, Adhesives, Etc.*
